## Current Feature Overview

### Destroy

Use your MATA-Tool (Remote Manipulation Device) to harvest trees, foliage and mineral rich rocks within a real-time physics driven environment. Obtain Material Shards for use in outpost building, weapon construction and powerful upgrades. Destroy and recreate your surroundings at will; the world is yours to manipulate, just watch out for the indigenous lifeforms...

### Build

Use gathered Materials to craft defenses, walls, ramps and turrets to protect your outpost or construct powerful weapons and upgrades for your Pioneer. Place gathered Materials within your Eden Kit to store, or use them to upgrade the Eden Kit's protective shield and power additional defenses. Expand your territory by building additional Eden kits. How you balance your resources is up to you.

### Protect

Using unique physics-driven combat you can remotely grab enemies and smash or blast them into the destructible environment. Upgrade your weaponry to tackle the alien hives and claim the territory for your own. Combine different attacks and abilities in order to survive against enemies and environmental hazards. A simple, but fluid movement system gives you freedom to move athletically across surfaces.

Death in Eden Star is permanent. You can be reconstructed back by the Eden Kit provided it contains Teslinium and remains intact, but naturally it must be protected...

I've played this mod for damn near a decade, it's always been one of the most fun and explorative modifications to any game ever devised, but plaguing it with some of the most malicious spyware available on the market is just a bridge too far. It's a goddamn shame that I have to uninstall it and never play it again, because I do, I want to play it, but I'm not going to support that decision.. A truly beautifully made VR short that shows the capabilities of VR as a cinematic experience.

Very well done.. "You are ugly and your mother dresses you funny."

10/10 would insult m'lord again. Best game ever, I am having more fun on it now than ever.. sometimes a pipe is just a pipe. bad just bad but it looks good

I enjoyed chemo more than this. Amazing platformer with a great soundtrack and cool graphics. Challenging but rewarding. Very recommended!. Enjoyable game so far. Clicking simulator, but still fun. :P. not a good game. Do you want to get 5 easy steam achievements and never play again? I would only recommend buying with coupon.

EDIT: Also game is called FREEbie released by FREE Games and yet isnt free...very ironic.... Been there, drawn that.

The base game is neat, but this DLC is completely uninspired, merely reusing assets most of the time and arranging them far less exciting than how the main game does.

Don't let this DLC taint the little smile the base game manages to give you.. A must have if you are into Wargames.. If you want a new shoot 'em up specifically in the vein of Gradius, you'll find it here. While the graphics and music might be a little cheesy or off-putting, the weapons, stages, and bosses will literally blow you away, and you'll love every second of it. I've started a new run maybe thirty times and only recently beat it, so expect plenty of deaths and game overs, but pushing yourself a little harder to reach the next insane boss or stage is totally worth it.

The weapons are pretty standard, but the power-up system is just different enough to catch you off guard when you finally bite it and lose a few points and your weapons power down. Thankfully, while the game is pretty hardcore and the bosses are totally nuts, there are several checkpoints and mid-points during stages and boss fights that give you a few upgrades so you're not totally ruined when you twitched into a ceiling or missile just seconds from a victory.. Well, I enjoyed it, even though it certainly is brief. I'm not saying that to be contrary to the torrent of dull "I demand my 10 minutes/two dollars back!!" reviews here, as if either of those things were so rare, but the game (which would be better termed as an interactive short movie since there are no variables, even though it presents you with multiple choices often), was strange and surreal and maybe predictable, but still an entertainingly unique experience. A pretty weird trip for a few bucks and a few minutes.. Quality game. Not revolutionary, but entertaining and inexpensive.

-P.S. I want my Patchface DLC.
